

## Gaming Machine

### Abstract

A gaming machine (1) having a display device (21) is provided with  
5 a sound transmitting section (902L/R) disposed on either or both sides of  
the display device (21) and a sound transmitting passage (904L/R) for  
guiding sound from a speaker main body (920L/R) to the sound  
transmitting section (902L/R). The sound transmitting section (902L/R)  
may be formed in a vertically long shape. The sound with the gaming  
10 machine (1) can be emitted at a position close to the player's ears.  
Therefore, the gaming machine (1) having the sound transmitting sections  
on the left and right sides of the display device (21) can be provided without  
narrowing the display device (21) or widening the gaming machine (1).
